

International Week in Austria

Internationalization fosters intercultural and global understanding, therefore SSE Riga is an active member of the Erasmus student and teacher mobility programme. During the last two years SSE Riga has developed very efficient cooperation with the Erasmus partner university IMC, Krems – University of Applied Sciences in Austria. In addition to regular student exchange between both institutions, SSE Riga Pro-rector Diana Pauna participated in the International Week organized by IMC Krems on May 21 -25, 2007. It was a great opportunity to meet university professors from all over the world and also to meet regular IMC students and those who have been exchange students at SSE Riga. In addition to networking events, Dr. D. Pauna ran a seminar on “Creativity and Entrepreneurship” to students studying corporate governance and e-business management, tourism and leisure management and health management, comparing the current developments in Latvia and Austria, Riga and Vienna, looking at the entrepreneurial activity, cultural employment and Euro-Creativity Index trends.
